

Person Centered Technology Support Addendum

Individual Name:	
Date:	
Program Manager completing report:	
Date reviewed and authorized by PCTM:	

Purpose:
 The following assessment is based on information given by the individual’s program manager and gained by the person centered technology manager after completing the initial consultation. The information produced as a result of this assessment will describe the individual’s functional skills and abilities concerning the need for technology as a support as well as outline possible solutions and future outcome documentation.

Program Managers: Please refer to the initial technology consultation sheet, functional skills assessment, and CSSP to complete this form. Your assessment must be completed before the Person Centered Technology Program can continue processing your request.

Technology Assessment	Program Manager Assessment – Individual	Technology Manager Assessment
What is the need or problem the individual faces?		<u>Proposed Solution:</u>
What is the desired outcome of implementing a technological support?		<u>Person Centered Assessment:</u>
How does the individual interact with technology (use of keyboard, mouse, track pad, touch screen, headphones, ect),
